

نور للطاقة NOUR ENERGY

Rental Power Solutions

Nour Energy believes that exceeding customer expectations is what sets apart the commercial successes of our era from the commercial failures. The business world today continues to evolve and the success or failure of organizations is often tied to their ability to remain focused on customer satisfaction, reduce overhead to provide real value, and remain dedicated to exceeding the expectations of their clientele. Nour Energy holds forth that same vision as the model for its success.

At Nour Energy, we are dedicated to providing a level of service which eclipses our competitors... We do it better, We are passionate about client satisfaction, committed to lowering costs, and dedicated to exceeding our clients' expectations. It is this passion, commitment, and dedication that have allowed us to grow.

Nour Energy is a leader power provider in Power Generation sector. Having extensive experience in the supply, installation, testing, commissioning, operation and maintenance of low voltage and medium voltage power system that includes generating units, transformers, switch gears, LV and MV cables and fuel supply systems.

Nour Energy is committed to the energy, industries, and is comprised of industry experts who possess the global experience, knowledge, financial depth, and a reputation for exceeding our clients expectations. Our backgrounds include a wide variety of skill sets and experience which allows us to quickly understand our customers' needs and provide innovative solutions. The value we bring you begins in the development stage of a project and continues through the construction, start-up, and long term operations and maintenance of a facility.

Our Proof is in Our Performance!

1-Rental Of Power Generators (50 KVA-1400 KVA)

At the heart of a generating set is its engine, Perkins and Cummins diesel engines which are ideal for commercial or industrial power applications. Reliability, low vibration, class-leading load acceptance & self diagnostic electronic engine management are just some of the premium features utilized in our units. In co-operation with the latest Stamford Leroy Somer alternators these sets offer something special with a complete 'ready to run' specification with features such as : electronic engine governor, radiator with 50 C , heavy-duty chassis and vibration mounts, Daily Tank Sound Proof Canopy, Air Filters, we ensure superior performance with the functions to match.
